GEBO.AI SETUP GUIDE · MONITORING · PAGE 21

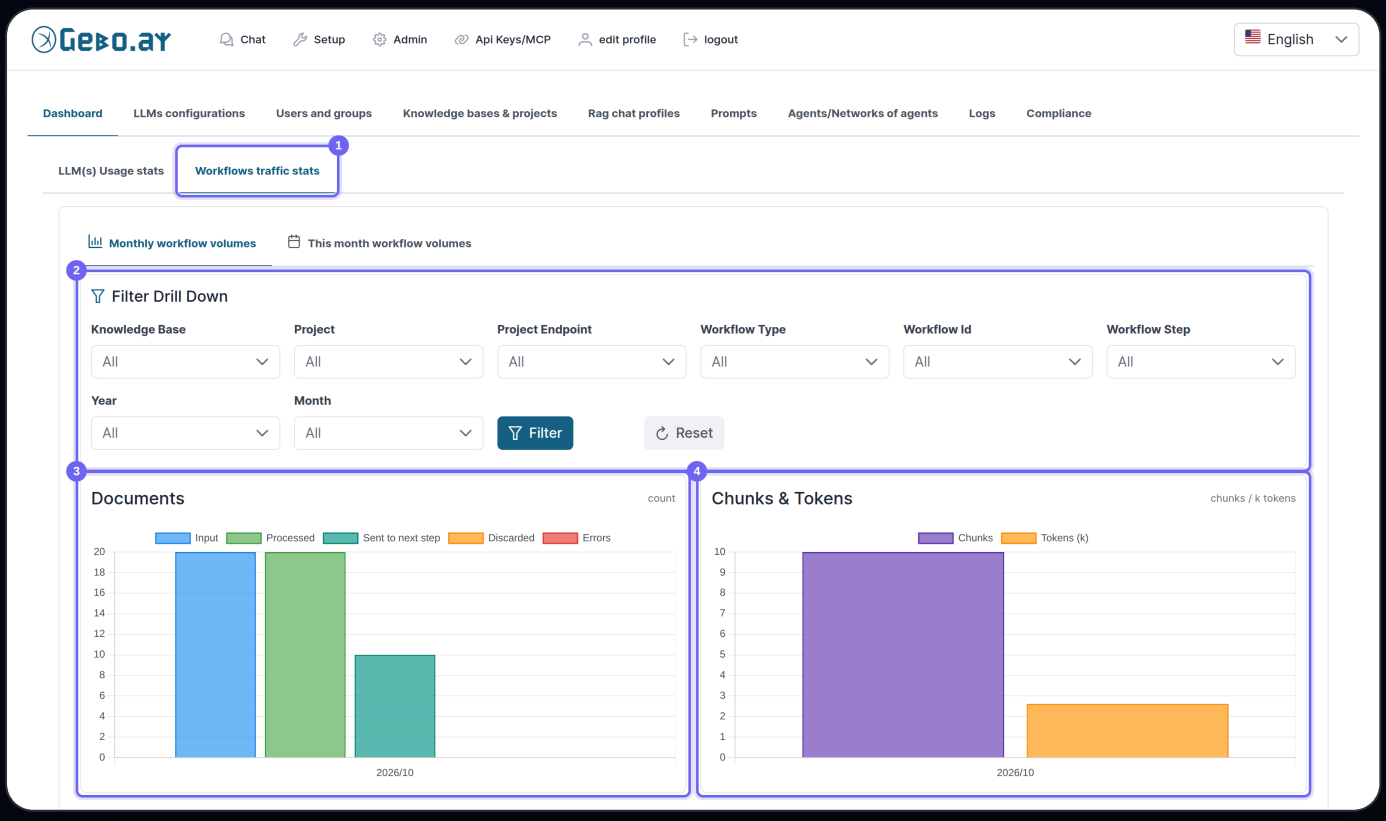
Ingestion traffic

How many documents the ingestion received, processed, passed on, left out or failed, and how many chunks and tokens it produced, for each knowledge base, project and data source.

WHERE	Admin → Dashboard → Workflows traffic stats.
YOU NEED	An administrator account.

1 Open the statistics

In **Admin** → **Dashboard** click **Workflows traffic stats** (1). As for the models, **Monthly workflow volumes** shows the months one by one and **This month workflow volumes** the current month day by day.



The filters (2), the documents (3), the chunks and tokens (4).

The filters (2) narrow the charts to a **Knowledge Base**, a **Project**, a **Project Endpoint** (a data source), a workflow and one of its steps, a **Year** or a **Month**. Choose the values and click **Filter**.

2 Read the charts

- **Documents** (3): **Input** received, **Processed**, **Sent to next step**, **Discarded** (left out of the ingestion) and **Errors**.
- **Chunks & Tokens** (4): the pieces the documents were split into, and their tokens in thousands: the embedding costs follow them.

Errors above zero point to the runs to open in **Logs** (page 22).
